

VEGA DAILY

VITAMINS TO VEGA

Vega, China vitamins manufacturer

22th DEC. 2023

Vitamin | Inositol

Affected by market demand and sufficient factory supply, the market price has been in a downward trend in the past month. Customers are mainly in urgent need of purchasing and have a strong wait-and-see mood. The current market price ranges from USD8.3/KG to USD10.9/KG. , prices have been relatively stable in the past two weeks and are expected to remain weakly stable in the future.

Amino Acid | Tryptophan

According to customs data, 2,130MT of tryptophan were imported in November, a month-on-month increase of 45.2%, and a year-on-year increase of 50.6%; from January to November, a total of 18,603MT of tryptophan were imported, a year-on-year increase of 10.1%. Recently, the price of tryptophan has been stable at a high level, and the stock is tight. Due to the high price, end users purchase on demand. In the future, the high level of tryptophan is expected to remain stable.

API | Florfenicol

Affected by the price of raw materials and supported by factory costs, the price this week is USD26.5-27.2/KG, and the delivery date of some factories has reached mid-to-late January. At present, market demand has not improved significantly and is expected to remain stable in the future.

FOOD ADDITIVES | Aspartame

Recently, aspartame has been affected by market demand, and the market transaction price is around USD9.5-10.1/KG. It is expected that the price will continue to remain stable in the future.
