Vitamins to VEGA!

12th. September. 2024

## VITAMIN

01

On September 11, Brother Technology released a quotation showing that the tonnage price of vitamin B1 nitrate was USD30/KG, while its nicotinamide price was USD7.4/KG, with a note that limited orders were accepted. On the same day, Anhui Ruibang Biological also resumed its quotation, with 3-cyanopyridine quoted at USD5.7/KG and nicotinamide quoted at USD7.4/KG, also adopting a limited order acceptance approach.

## AMINO ACID

02

Recently, the solid methionine market has seen relatively light transactions. Overall, the market has seen weak transactions and low trading volumes. It is expected that the methionine market will maintain a relatively weak operating state in the short term.

## API

03

Recently, the supply and demand of florfenicol market has remained relatively stable, but the supply of some brands is slightly tight. At present, the price of mainstream factories is maintained at USD22.6/kg-USD23.3/kg, and the price bottom has been adjusted. The market is in a wait-and-see mood, and we will continue to pay attention to changes in market demand and supply in the future.

## FOOD ADDITIVE

04

Affected by market conditions and rising raw material costs, the prices of sucralose, a mainstream food sweetener, are adjusted by domestic manufacturers from today: the price of a 25kg large package is increased to FOB price of USD25/kg; the price of a 10kg small package is increased to FOB price of USD25.3/kg. In the long run, it is expected that the price of sucralose will continue to rise in the future. Therefore, it is recommended that end users purchase on demand and consider stocking up appropriately to cope with the possible continued price increase trend in the future. We will continue to pay attention to the market situation and price trends of sucralose.
