VITAMIN | Vitamin E

01

In the recent two weeks, the overall performance of vitamin E market was stable. The number and frequency of customer inquiries maintained a high level, however, the willingness to place orders was not strong, and most downstream customers held a wait-and-see attitude. Up to now, the export FOB transaction price is around \$16.5-17. The European market price is about 15.8-16.5 euros, and the American market price is 16-18 U.S. dollars. Combined with the current overall market situation, vitamin E is one of the vitamin products that have the potential to continue to rise in 2025.

AMINO ACID | Methionine

02

NHU Methionine plant latest maintenance plan, it is reported that Shandong Xinhecheng amino acid plant will be in late July to early August on the methionine production line rotation maintenance.

API | Florfenicol

03

Florfenicol, the recent market price is running weakly and steadily, the domestic and foreign markets just need to purchase mainly, the supply is more abundant, the current factory offer is around 23usd, later attention to the factory production situation.

FOOD ADDITIVE | Carnitine

04

Recently, affected by the market situation and the supply of raw material propylene oxide, the prices of carnitine series this week are as follows:

Carnitine Base: mian brand quotes 21.7usd-23usd/kg

L-carnitine Hcl: mian brand quotes 23usd-24.3usd/kg

L-carnitine tartrate: mian brand quotes 20.5-21.7usd/kg

The price of carnitine series will be bullish in the future, and we will continue to pay attention to the market situation.
