VITAMIN

01

Shandong Benhan Biotech invested in new production project of food grade vitamin B2 and the project was registered recently. The total construction area is 1,000 square meters with steam generators, enamel kettles, centrifuges, ovens, universal crushers, granulators, circular vibration screens, packaging scales, pure water machines and other equipment. The annual capacity will be around 100 tons after completion. The total investment of the project is about \$695,000, of which environmental protection investment accounts for about \$23,600.

AMINO ACID

02

Threonine: Domestic manufacturers stopped quoting and mainly focused on delivery. Spot supply in the trade market was tight, and quotations were strong at \$1.25-1.30/KG. Domestic market inquiries increased and buyers signed orders on demand. It is expected that the price of threonine may be stable and strong.

API

03

Warrant Pharmaceutical announced on 10th Mar. that the company's wholly-owned subsidiary Hunan Warrant Pharmaceutical Factory Zhigen Pharmaceutical Co., Ltd. would be the implementing entity to build a "green intelligent manufacturing base (Phase II) with 3,000 tons annual capacity for high-end APIs and intermediates". The total investment for the project is expected to be no more than 69.44 million dollars (the final total investment in the project is subject to actual investment), mainly including the construction of production workshops, equipment purchase, equipment installation and other expenses. The specific construction content includes the production lines for products such as L-carnitine and clopidogrel bisulfate.

FOOD ADDITIVE

04

Due to the continued rise in sucralose raw material prices and inland freight, the shutdown and maintenance plan in April, Anhuijinhe/ Shandong Kanbao/ Fujian Techno decided to suspend the quotation of sucralose products from March 10, 2025. Factories will make every effort to ensure the supply of existing orders and continue to optimize product quality and service.
